| • JavaScript | • React | • TailwindCSS |

WORK EXPERIENCE

Appaxon Solutions - Frontend Developer Intern

PRESENT

Responsibilities:

- Develop responsive and cross-browser compatible web templates for commercial distribution across multiple marketplace platforms.
- Design modular components, including page layouts, sections, and hero elements. Implement clean, maintainable code, following industry best practices.
- Collaborate with team members via Slack, and utilise Git for version control.

PROJECTS

Nexus Engineering Industries

- Developed a responsive, modern website for Nexus Engineering using React.js, React Router, and Tailwind CSS
- Implemented a mobile-responsive design with an intuitive navigation system featuring smooth transitions and animations using Framer Motion
- Created component-based architecture with reusable components including Navbar, Footer, Hero sections, and service cards
- Built a multi-page application with router implementation for Home, About, Services, and Contact pages
- Incorporated responsive image handling and flexible grid layouts to ensure compatibility across all device sizes
- Integrated JSON data management for dynamic service content rendering

Personal Portfolio(currently working on)

Created a responsive personal portfolio website using React.js and Vite to showcase my projects and skills. The website features:

- Modern UI with responsive design using Tailwind CSS for mobile and desktop experiences
- Interactive components including animations, parallax effects, and typewriter animation
- Multi-page architecture with client-side routing via React Router
- GitHub activity visualization using the GitHub Calendar API
- Optimized loading with Lottie animations and efficient component structure
- Skills and tools showcase with interactive technology cards
- Cross-browser compatibility and accessibility considerations

Technologies: React.js, Vite, Tailwind CSS, React Router, Lottie animations, React Icons, React Typewriter Effect, Parallax Tilt
