Bachelor's Of Technology in Artifical Intelligence and Data Science

SKILLS

- HTML5
- JavaScript
- CSS
- React
- BootStrap
- TailwindCSS

WORK EXPERIENCE

Appaxon Solutions - Frontend Developer Intern   **PRESENT**
Responsibilities:
- Develop responsive and cross-browser compatible web templates for commercial distribution across multiple marketplace platforms.
- Design modular components, including page layouts, sections, and hero elements. Implement clean, maintainable code, following industry best practices.
- Collaborate with team members via Slack, and utilise Git for version control.

PROJECTS

Nexus Engineering Industries (Live Link)
- Developed a responsive, modern website using React.js, React Router, and Tailwind CSS featuring smooth Framer Motion transitions and intuitive mobile-responsive navigation.
- Built a component-based architecture with reusable elements across multiple pages, integrating JSON data management for dynamic service content rendering.

Personal Portfolio(Live Link)
- Created a responsive portfolio website using React.js, Vite, and Tailwind CSS with interactive elements including animations, parallax effects, and GitHub activity visualization.
- Implemented client-side routing via React Router with optimized loading using Lottie animations while ensuring cross-browser compatibility and accessibility.

Postgrestore (Live Link)
- Built a full-stack e-commerce application with React.js frontend (Vite, Tailwind CSS, DaisyUI) featuring responsive design and React Hot Toast notifications.
- Developed a Node.js/Express backend with PostgreSQL database integration (Neon DB), implementing RESTful API endpoints for product CRUD operations.
