## Summary

---

Frontend developer transitioned to full-stack: React, TypeScript, Electron, and React Native (Expo); Node.js/Express, Prisma/PostgreSQL, WebRTC/WebSockets, and GitHub Actions CI/CD. Shipped cross-platform communication apps, CanvasRTC, and Next.js marketing sites.

## Experience

---

### Coincade Studios

June 2025 – Present

Junior Frontend Developer

Mumbai, Maharashtra

- Built the Electron desktop client with React, TypeScript, electron-vite, and Tailwind—auth, workspaces, channels, DMs, threads, presence, search, rich text, secure credentials, local persistence, OS notifications, auto-updates, and Windows/macOS/Linux packaging.
- Developed the React Native mobile app with Expo (Expo Router, TanStack Query, NativeWind, EAS)—delivering auth, workspaces, chat, push notifications, and staging/production API environments aligned with the desktop feature set.
- Implemented real-time collaboration and voice/video huddles: REST and WebSocket clients against auth/messaging/upload/call services, mediasoup-client on desktop, and react-native-webrtc on mobile for live calls, screen share, and reconnect handling.
- Contributed to a Turborepo Node.js/TypeScript microservices backend (Express, Prisma/PostgreSQL, Redis, Docker) and GitHub Actions CI/CD with lint/type-check, Vitest, path-filtered image builds, migrations, and staging/production deploys with smoke checks.
- Shipped corporate marketing sites in Next.js, React, TypeScript, and Tailwind—including a bilingual (EN/FR) site with next-intl, Framer Motion, SEO, Google Maps, and contact workflows—while keeping desktop/mobile UX aligned via shared API contracts.

### Appaxon Solutions

May 2025 – June 2025

Frontend Developer Intern

Remote

- Led front-end development for KodeLayout, delivering the marketplace's first reusable HTML template from requirements through responsive layout systems, reusable UI sections, and production handoff under tight timelines.

## Projects

---

**CanvasRTC** | React, TypeScript, WebRTC, WebSocket, Express, Prisma, PostgreSQL, quickdraw

Real-Time Collaborative Canvas Platform

[Live](#) | [Frontend](#) | [Backend](#)

- Built a full-stack collaborative whiteboard where teams create/join rooms via shareable codes and brainstorm on a shared canvas with live cursor presence and auto-saved board snapshots.
- Implemented mesh WebRTC audio/video alongside the canvas using custom signaling over WebSockets (offers, answers, ICE), STUN fallbacks, and in-room peer limits for browser-based calls.
- Developed the React/Vite frontend with tldraw for real-time board sync and an Express + Prisma/PostgreSQL backend for auth (JWT, email verification), room membership, board persistence, and thumbnail previews.

## Technical Skills

---

**Languages:** TypeScript, JavaScript

**Frontend:** React, Next.js, Electron, React Native, Expo, Tailwind CSS

**Backend:** Node.js, Express, Prisma, PostgreSQL, Redis, WebSocket, WebRTC

**Tools:** Git, GitHub Actions, Docker, Turborepo, Vercel, DigitalOcean

## Education

---

**New Horizon Institute of Technology & Management, Thane**

B.E. in Artificial Intelligence and Data Science

May 2025

Thane, Maharashtra
